

Light

What few beer drinkers know, is that quality light beer is incredibly difficult to brew. The slightest irregularity is glaring to the taste buds since there's little to mask any defects. "Light beer is a brewer's beer." Mastering the delicate flavors and aromas of this thirst-quencher requires a remarkable level of brewing skill and precision.

The water must be uttermost pristine and the malt of the highest quality to produce each ounce of this straw-coloured liquid. The elements are beautifully balanced and there are no faults.

- Tastes great! - Less filling! - Genuinely refreshing!
